Hi, I'm Harriet. I'm a Teesside-based videographer and photographer, specialising in crafting content that makes brands stand out from the crowd. I'm a passionately imaginative person, with the technical know-how to create stunning visuals. Well-versed in a variety of software and editing programs, I find huge joy in crafting compelling videos that tell stories and capture the essence of a brand.

Never settling for mediocre footage, I have demonstrated the ability to create original, high-quality content that brings results; whether it be an increase in sales, web presence or audience engagement.

## Experience.

### PRODUCTION LEAD | VISUALSOFT

December 2019 - Present

- I work with a variety of brands to provide video & photography solutions in a range of formats, including adverts, interviews & tutorials.
- I am responsible for the entire creative process: from planning, creating proposals & pitching, through to filming and post-production.
- Over the past 4 years I have demonstrated my ability to troubleshoot issues, adapt to changing lighting conditions and co-ordinate with other professionals on a shoot.
- Personal wins include growing the videography & photography service to deliver over 50 shoots in 2023 and successfully pitching for new or increased creative retainers with some fantastic brands.

### VIDEOGRAPHER | MIDDLESBROUGH COLLEGE

June 2018 - November 2019

- Working as an essential part of the Marketing team, I produced promotional videos in a range of lengths and formats, both within the college and on location.
- Utilising storyboard creation, camera & lighting operation and post-production techniques, I created content used for recruiting both students and staff, training videos, case studies and other materials.
- Photography was a large part of this role too, coming into play across interviews, social media posts, website imagery and print articles.

### ARTS TECHNICIAN | BEDE SIXTH FORM COLLEGE

March 2017 - June 2018

- This varied role allowed me to flex my creative muscles, assisting students with Adobe Premiere, Photoshop & Illustrator and demonstrating new editing techniques.
- Setting up studio equipment, facilitating shoots and teaching camera workshops allowed me to pass on knowledge to a new generation and was incredibly rewarding.
- To elevate the college's online presence, I filmed and photographed events, produced promotional videos and collaborated with our Marketing team.
